

## Cover Photos

Top (left to right): Moshe J. Lubin, the founding director of the Laboratory; Robert L. Sproull, University of Rochester President at the time of the Laboratory's founding; Robert L. McCrory, present LLE CEO and Director; Donald K. Hess, University of Rochester Vice President at the time of the Laboratory founding, and along with Sproull, key to its successful implementation; Jay M. Eastman, LLE Director 1981–82 and project manager for the original OMEGA 24-beam Laser System.

The photographs on the bottom show (left to right): photograph of the ZETA target chamber used to conduct experiments with the first six beams of the OMEGA system; the OMEGA EP laser (LLE's latest laser facility) activated in 2008; the OMEGA 60-beam target chamber area during a target shot taken in 2008; the OMEGA 60-beam UV laser amplifiers during a shot taken during the system activation in 1995; and the original 24-beam OMEGA laser activated in 1980. In the background is a photograph taken of a target shot inside the target chamber of the OMEGA 60-beam laser facility.

This report was prepared as an account of work conducted by the Laboratory for Laser Energetics and sponsored by New York State Energy Research and Development Authority, the University of Rochester, the U.S. Department of Energy, and other agencies. Neither the above named sponsors, nor any of their employees, makes any warranty, expressed or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, mark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof or any other sponsor. Results reported in the LLE Review should not be taken as necessarily final results as they represent active research. The views and opinions of authors expressed herein do not necessarily state or reflect those of any of the above sponsoring entities.

The work described in this volume includes current research at the Laboratory for Laser Energetics, which is supported by New York State Energy Research and Development Authority, the University of Rochester, the U.S. Department of Energy Office of Inertial Confinement Fusion under Cooperative Agreement No. DE-FC52-08NA28302, and other agencies.
