

## About the Cover:

The cover photograph shows the inside of the OMEGA target chamber during one of the first shots in which all 60 beams were used to irradiate a target. The photograph shows the target positioner (top) and the six pinhole cameras, identical and equidistant from the target, used to diagnose the beam positioning. The bright circle surrounding the target is a flange on the opposing diagnostic port illuminated with visible light from the target plasma. The diagnostic near 5 o'clock is a plasma calorimeter. This shot was one of a series used to demonstrate that the upgraded OMEGA system exceeded its performance goals.

This report was prepared as an account of work conducted by the Laboratory for Laser Energetics and sponsored by New York State Energy Research and Development Authority, the University of Rochester, the U.S. Department of Energy, and other agencies. Neither the above named sponsors, nor any of their employees, makes any warranty, expressed or implied, or assumes any legal liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately owned rights. Reference herein to any specific commercial product, process, or service by trade name, mark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or any agency thereof or any other sponsor. Results reported in the LLE Review should not be taken as necessarily final results as they represent active research. The views and opinions of authors expressed herein do not necessarily state or reflect those of any of the above sponsoring entities.

The work described in this volume includes current research at the Laboratory for Laser Energetics, which is supported by New York State Energy Research and Development Authority, the University of Rochester, the U.S. Department of Energy Office of Inertial Confinement Fusion under Cooperative Agreement No. DE-FC03-92SF19460, and other agencies.
