

There are two possible LOS for CEA nTOF calibration in DD shots on OMEGA through port H10

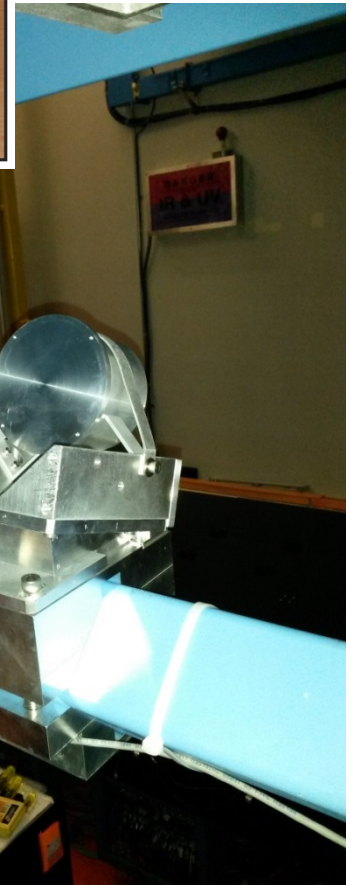

CEA LOS # 1 : H10F at 5.4 m from TCC

CEA LOS # 2 : H10G at 5.3 m from TCC

PD040 is relocated to different LOS

The third possible LOS for CEA nTOF calibration in DD shots on OMEGA is “NIF nTOF1” LOS in port P8D

CEA LOS # 3 : P8D at 5.3 m from TCC
